CLOVERLEAF BUILDING 3, 6405 METCALF  
OVERLAND PARK, KANSAS 66202

Justification for No Further Action:

A site reconnaissance confirmed previous information that Comdaco had used asbestos in their manufacturing process for about twenty years. It was also revealed that the company had discontinued the use of friable asbestos in 1983 or 1984. All products containing asbestos have been sold to retailers and currently the plant has no raw asbestos or asbestos containing products on-site.
